CABLE DROP

PRODUCT COMPARISON GUIDE

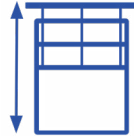

WHAT IS CABLE DROP?

SMOOTH
INSTALLATION

PAINLESS ORDERING
PROCESS

FUTURE PROOFING FOR
HEIGHT ADJUSTABILITY

CREATES USABLE SPACE
ABOVE VIEWING AREA

UNDERSTANDING CABLE DROP

Cable drop is a feature that elegantly suspends the screen surface and eliminates black drop – the black border above the projection screen. Specifying drop distance upon ordering is a thing of the past. Now, vertical placement of the screen can be variable as the cables accommodate a range of drop distances between the ceiling and the top of the screen – making ordering a snap. What's more, this feature creates usable space above the viewing area to preserve architectural interests and provides the opportunity for camera/ speaker placement. Cool beans.

CABLE DROP PRODUCT EVOLUTION

We've come a long way in engineering since introducing our pioneering Wireline Advantage® with cable drop screen technology. Back then, it was a game-changer for projection screen technology. But today, as technology races forward, the Wireline is becoming a bit, should we say, old hat. Enter our latest innovation: the SightLine™ cable drop feature. Discover how this cutting-edge technology sets a new standard in screen engineering with a more approachable price point and a wide range of size offerings.
